

AUTOMATIC TOUCHLESS HAND SANITIZER DISPENSER

- **Fully Automatic and Touch-Free**

No need to touch any part. Place your hand under the nozzle and an infrared sensor will detect your hand and dispense the chemicals (sanitizer or soap) automatically.

- **Suitable for Multiple Solutions**

This machine can be used for disinfectant spray, disinfectant gel or liquid soap.

- **Level-Checking Window**

With the transparent window, the user can easily check the level of liquid without opening the front cover.

- **LED Indicator**

When the LED indicator blinks in green, it means the machine is operating. When the LED indicator lights up in red, it means the battery power is low.

- **Power Mode (AC / DC available)**

The machine can be used with 4 D-cell batteries or the AC power adaptor.

Four new alkaline batteries can operate the machine over 100,000 times (tested with soap).

- **On / Off Switch**

When the machine will not be used for a long period of time, the user can turn the switch to "off" to save power.

- **Dispensing Volume Adjustment**

The dispensing volume can be adjusted by the user.

Dispenser can be installed virtually anywhere it's needed.

Touch-free dispensing.

- **Sensor Volume Switch**

The sensor detecting area can be adjusted with the sensor volume switch.

- **Easy Mounting Anywhere**

The machine can be mounted on the wall or stand on a desk. You can install this unit anywhere in a hospital, restaurant, kindergarten etc.
